Career and Technical Education Laboratories

Career and Technical Education Laboratories

The College has established multiple laboratories for programs, including healthcare and skilled trades. The labs simulate workplace settings by providing a realistic environment, equipment, and workplace scenarios, allowing learners to practice and perfect their skills in a guided learning environment.

- Healthcare Laboratories include Adult Healthcare Simulation Lab, two Nursing Simulation Labs, Emergency Medical Services (Great Bend, Grandview Plaza), and Medical Laboratory Technician.
- Skilled Trades laboratories include Carpentry Shop, Welding Shop, Natural Gas Facility, Case New Holland program, and Criminal Justice simulations.
- The Hazardous Materials and Emergency Training Institute hosts multiple programs that provide immersive, realistic training that often occurs outside of the traditional classroom. These “laboratories” may include simulated scenarios and actual workplace locations; programs include Hazardous Materials Management, Emergency Management, and Occupational Safety and Health.
