Military On-Site Training

Barton Community College's Military On-Site Training (MOST) program is designed to enhance the readiness of Military units via quality, cost-effective, skills-based training.

- ✦ All courses are delivered in a hands-on training format
- ✦ College credit may be available depending on location
- ✦ Instruction can be customized to meet the specific needs of each command
- ✦ Courses can be scheduled for weekdays, weekends, evenings, even reverse cycle to meet organizational training requirements

Significant savings can be achieved by bringing the training to your location. Sending unit personnel to distant installations can become cost prohibitive as the number of soldiers requiring training increases. Barton's MOST program is designed to significantly reduce your unit's associated cost of travel, per diem, and other expenses.

Contact us for a quote today!

Our instructor cadre consists of dedicated subject area experts with extensive military backgrounds who bring real-world experience to the classroom. The MOST program teaching philosophy is to provide high quality skills-based training at your location. Our approach is to teach the warrior, not the book. The goal is for every Soldier to depart the class with a thorough understanding of course content and the ability to begin using their new skills immediately.

Barton Community College is a key provider of centralized sustainment training for the First Infantry Division's DPTMS Military Schools. Barton's collaboration with Fort Riley and the U.S. Army began in 1984 and has continued to grow in support of the Army, its Soldiers, their families, surrounding communities and other installations around the nation.

Other locations where Barton routinely provides mobile training support include:

- Aberdeen Proving Ground, MD
- Fort Benning, GA
- Fort Gordon, GA
- Fort Huachuca, AZ
- Fort Irwin, CA
- Fort Knox, KY
- Fort Leavenworth, KS
- Fort Leonard Wood, MO
- Fort Meade, MD
- Fort Sill, OK
- Fort Sheridan, IL
- Kadena AFB Okinawa, Japan
- KSARNG & USAR Units throughout KS

AVAILABLE COURSES

Department of Transportation (DOT) Course

Provides students with a detailed study of U.S. Department of Transportation (DOT) regulations. Topics include identifying regulated materials, preparing shipping papers, inspection of packaging and label determination. Available to Ammunition, Fuel Handlers and Petroleum Specialist and soldiers requiring DOT Certification/Recertification.

Ammunition Handler Course

Provides performance oriented training on receipt, accountability, transport and safety for live ammunition and related residue.

Bus Driver Training Course

Trains and licenses personnel to operate a Government Transportation Motor Pool bus while complying with federal, state and applicable installation regulations and observing safety procedures governing passenger carrying vehicles. Due to the unique state laws, this course is offered within the state of Kansas.

Combat Lifesaver Course

Trains non-medical soldiers to provide immediate lifesaving measures beyond the level of self-aid or buddy-aid to wounded soldiers in forward battle areas.

Digital Training Management System (DTMS)

This course provides training managers at the company, battalion, and brigade levels with hands-on instruction in the functional operation of the Digital Training Management System (DTMS). Instruction covers basic systems access including unit training management, enrollment, Battle roster analysis, ad-hoc and status reporting, seat allocations, soldier and organizational participation tracking, class scheduling, real time event and resource management, tracking new equipment training as well as sustainment training.

Field Sanitation Team Training Course

Provides formal training to unit level Field Sanitation members. Installation specific regulations and practices are used IAW local regulations.

Fuel Handler's Course

Provides performance oriented training on administrative and technical tasks required of a Petroleum Fuel Handler. Installation specific regulations and practices are used IAW AR 710-2 and DA PAM 710-2-1.

Hazardous Waste Operations And Emergency Response (HAZWOPER)

This course provides students with hands-on experience in responding to chemical incidents, specifically toxic industrial chemicals and materials (TICs/TIMs), that can be deployed as weapons. Course also meets 29CFR 1910.120 requirements for OSHA HAZWOPER 40 hour training.

CBRN Defense Course

This course prepares students to function as unit CBRN Defense Officers/NCOs. Topics include chemical, biological and nuclear defense organization and training requirements; chemical agents-physiological effects, protective measures and first aid; biological agents-physiological and physical effects, field behavior and first aid; protective measures and effects of nuclear weapons (blast, heat, initial and residual radiation, and electromagnetic pulse), protective measure, yield estimation, fallout prediction and operational aspects of radiation; NBC reports, maintenance and use of chemical, biological, nuclear, and radiological defense equipment and material; individual and collective protection; decontamination; and Smoke Pot requirements and effects of weather and terrain on smoke.

Global Combat Support System- Army (GCSS-A) Equipment Parts Records (ERP) Operator Course

Provides sustainment training in duties and responsibilities of a ERP Operator. This course combines all aspects of a maintenance management system, and repair parts re-supply system. Emphasis will include preparation and use of deferred maintenance, scheduling equipment services, and historical records. Related subject areas include material condition status reporting and publications.

Unit Armorer Course

Provides organizational maintenance of small arms. This includes inspections, disassembly, assembly, required operator/organizational maintenance, ordering of parts, maintaining small arms repair parts, and turn-in procedures for direct support maintenance. This course also includes physical security and proper physical security inspections conducted by your PMO.

Unit Armorer Supervisors Course

Provides training to leaders who supervise in the operations and management of the unit arms room, maintenance of weapons, required forms and reports, and physical security IAW AR 190-11.

Global Combat Support System-Army (GCSS-A) Supply Operator Course

This operator level course provides initial and job enhancement training to unit supply operator in the GCSS-A automated supply procedures and policies. Unit supply areas of emphasis include procedures

used that enable an organization to account for resources and provide managers with logistical data needed to ascertain spending trends and to account for property accountability, equipment inventories, and supply functionalities.

Master Driver Course

This course provides an overview of the procedures used by Commanders to control and account for training, testing, evaluating, and licensing vehicle and equipment operators. Theory and application of both manual and automated tasks are presented through the use of practical exercises. Global Combat Support System-Army (GCSS-A) is incorporated into the class.

Global Combat Support System-Army Maintenance Manager Course

Familiarize all levels of Maintenance personnel in the basic knowledge and skills for Motor Pool operations and management. The course includes training in duties, responsibility and procedures to conduct and manage a maintenance program, use of the GCSS-A program, shop operations, tool room procedures, and supply and safety procedures.

Transportation Coordinator Automated Information for Movement System II (TC-AIMS) Unit Movement I and II Courses

This course provides personnel with the knowledge and skills to perform the functionalities necessary to operate TC-AIMS II software. Give an overview of the Army deployment and re-deployment process, training designed for UMO officers and NCO to create Unit Deployment List. Update and maintain Organizational Equipment List.

Unit Load Team

Designed to train an individual on procedures to transport equipment by rail and aircraft. Personnel attending class will rail load vehicles using proper tie down procedures and build 463L pallets. Personnel that complete this course will be qualified to train smaller groups at their unit(s) on the proper procedures to load equipment on rail and aircraft.

Unit Movement Officer Deployment Planning Course (UMODPC)

UMODPC training is provided by Fort Riley Military Schools as a satellite training site. It is consistent with the resident course provided by the U.S. Army Transportation School (USATSCH). Prepares personnel with the knowledge and duties of a Unit Movement Officer/NCO. Provides instruction involving movement planning, Operational Equipment Listing, and preparation of unit supplies and equipment for movement by the different surface modes. Personnel will learn convey operations for highway operations, convoy documentation, and marshalling procedures. Be able to conduct rail load planning and operations, how to properly store supplies and equipment in containers for shipment. Personnel attending class will rail load vehicles using proper tie down procedures and build 463L pallets.
