Barton Course Shells

Course Shells – Barton online, hybrid, eCompanion, and face-to-face courses differ in the manner that they use course shells.

- 100% online course shell is a platform for which course content is added and taught from. Unlike F2F or eCompanion courses or Hybrid courses, the entire course is taught from the course shell.
- Hybrid course shell - a platform may contain some content, but contains mainly assignments, quizzes, homework, etc. that are covered in the classroom portion of the course. The course is not taught from the shell.
- eCompanion course shell - a platform that simply contains assignments, quizzes, exams, homework, etc. from the content covered in the classroom. Like Hybrid courses, the course is not taught from the shell.
