

## “Doing Accreditation”

### Assurance Argument

### Lessons Learned

- Use a “Systems Thinking” approach to take an abstract concept and break it into relatable pieces diffused throughout the campus community.
- Set up a methodical approach to meeting comprehensive accreditation requirements (e.g. [Criteria for Accreditation](#), [Assumed Practices](#), [Federal Compliance](#), [Obligations of Affiliation](#), [Focus Visits](#), [Required Reports](#), [Comprehensive Visit](#), etc.)
- Use communication hubs and project clusters to radiate accreditation discussion and actions throughout the campus.
- Capture and archive evidence continuously for accreditation required reports and activities.
- Ensure continuity of focus and endeavor.
- Nurture a multi-dimensional, inclusive paradigm for accreditation discussion, work, and awareness.
