### What's The problem?

Need a single, secure source for all institutional applications for students and employees to access.

#### The Opportunity Now more than ever, institutions needs to provide today's tech savvy end users with a personalized home for timely, actionable Higher Ed information. The Reality The Results Difficulty finding information Real-time personalization · Disjointed solutions requiring multiple logins result in Digital Integrations to frustration and wasted time many solutions with SDK • 40% of student said that dealing with administration to create more activities is so complex it cuts into study time Simplified Administration & Operations What's Needed Personalized, Roles Based Dashboard Modern and mobile responsive design A solution requiring minimal or no training for end users Rapid Implementation

We have different roles, so that students see certain cards and employees, faculty and staff see certain cards. The students do not need to see the card for Banner, they don't need to since they do not need access.

SSO – Single Sign On to all applications/software/tools – allows us to leverage making sure everyone sees access to these tools.

- 1. View announcements short to the point, have links point elsewhere for more information.
- 2. Degree progress from Degreeworks
- 3. Class Schedule card
- 4. Student Financials
- 5. Email in process of working on this card for all.

Activate cards certain times of the year, tax time, have the 1098T card there, inactivate after April.

Registration card available different times, Grade card available different times.

A view for employees – Retention factors, pull in PBI, Employee Profile, give us some ideas.

Where next? Future of Ellucian Experience, or as we know it, MyBarton Portal

Process of hiring an employee, this is currently and example of forms HR uses to process new employee.

An Example	
Let's consider a common process. Currently, hi	ring a new employee involves:
<ol> <li>PEAHIRE – to begin data entry, which then copies inform</li> <li>PPAIDEN – for identification information</li> </ol>	nation to
<ol> <li>PEAEMPL – for employee information</li> </ol>	
<ul> <li><b>A. NBAJOBS</b> – for job information</li> <li>then:</li> </ul>	6
5. <b>PDADEDN</b> – to define benefits and deductions	pages, all part of one common process.
<ol> <li>GXADIRD – to configure direct deposit</li> </ol>

A new hire adds a button – Add New Hire

How does this all really work?

It's complicated, but seamless.

Banner, Active Directory, Ellucian Ethos Identity and Integration

ERP, CRM (green layer) is the data, extensibility tools to define our institution processes

Blue Layer, is the capabilities, what can all this connect to

Purple Layer on top is, Ellucian Experience. Where it is all held together. Sits on top, provide access to capabilities and into the data layer.

ELLUCIAN EXPERIENCE	WORKFLOW processes with no boundaries
CAPABILITIES       Student Credential       Catiting       Continuing Education       Continuing Education       Student Card            Curriculum Management          Meastina Life          Meastina Sudent          Meastina Sudent          Payment Planning          Payment Planning <th>ANALYTICS turning data into knowledge REPORTING delivering transactional data Quantum DATA PLATFORM Multi- Source Highly Performant</th>	ANALYTICS turning data into knowledge REPORTING delivering transactional data Quantum DATA PLATFORM Multi- Source Highly Performant
