

TRACK AND SOCCER FACILITY RENOVATION

Detail: The current track facility is in need of renovation. Since the track was originally built as a 440-yard track, the footprint of the track must be altered to comply with the guidelines for a 400-meter track. This will require extensive renovation of the current facility. A request for design/build proposals was sent to the two major vendors in Kansas. Bids were received from Mid-America Golf & Field and ATG Sports. References have been checked for both firms and the Track and Soccer coaches have visited or played on a number of the surfaces provided by both firms. Both firms will provide quality-playing surfaces and quality workmanship.

Bids received:

Mid-America Golf & Field - \$1,589,339

ATG Sports - \$1,548,600

Recommendation: It is recommended that the Board of Trustees approves ATG Sport's low bid of \$1,548,600 for the renovation of the Track and Soccer facility.
