

## **Board Meeting** **June 27, 2013 – Practice Facility**

**Detail:** The Board had previously approved the replacement of the Kirkman gym floor. Due to the large number of sports using the facility, and the varying needs of each sport, both the scheduling of the practices and the facility needs for each sport make it difficult for all teams to use the same facility. Before we move forward with the Kirkman floor replacement, we need to identify the sports that will be using the facility. In order to provide sufficient space and flooring needs for each sport, bids have been solicited for the construction of a 100' x 150' practice facility to be located near the existing clubhouse. The facility would provide practice space for Soccer, Track (throwing), Baseball, and Softball.

Bid requests were sent to local vendors and provided to the Chamber plan room.

### **The following are the bids for the project:**

**Brentwood (Great Bend) - \$362,990**

**Steel Builders (Great Bend) - \$389,873**

**Wiens (Hutchinson) - \$391,500**

**Harbin (Salina) - \$425,700**

**Construction GT (Wichita) - \$514,215**

Funding for the construction of the facility would not come from the General fund. Instructional revenue/student fees would pay for the project.

**Recommendation:** It is recommended that the Board of Trustees approve the bid from Brentwood for the construction of the practice facility in the amount of \$362,990.
