

NIEHS and PETE Partnership

Who is NIEHS?

The National Institute of Environmental Health Sciences

- Global leader in the field of environmental health sciences
- NIEHS provides grants to [nonprofit organizations](#), including labor-based health and safety organizations and academic institutions

Who is PETE?

- The National Partnership for Environmental Technology Education (PETE)
- PETE provides convenient, memorable, and cost-effective training for hazardous materials and waste workers engaged in waste treatment, storage, and disposal; hazardous waste generation, cleanup, and remedial action; emergency response; and hazardous materials transportation.

What is CCCHST?

- A program administered by PETE through NIEHS grant funding
- More than 100 community colleges, tribal colleges and training partners across the globe
- Barton has been a member for over 20 years

Grant-Funded Programs

Hazardous Waste Worker Training Program (HWWT)

- Provides training to help participants protect themselves and their communities from exposure to hazardous materials
- 5-year Grant period
 - August 1, 2020 – May 31, 2025
- Barton has provided training for this grant for 13 years
- Base funding for 2022-2023
 - Just over \$221,000.00
 - 26 classes
- Grant funding in 2021-2022
 - \$258,743.36 (34 classes)

Training Schedule

HWWT Training Schedule
June 2022 - May 2023

Partnership Creates Job Opportunities for Transitioning Military Personnel and their Families

GRANTEE: Community College Consortium for Health and Safety Training, National Partnership for Environmental Technology Education

WTP grantee the [Community College Consortium for Health and Safety Training](#) (CCCHST), administered by the National Partnership for Environmental Technology Education (PETE), includes a network of more than 100 community and tribal colleges and training partners that provide health and safety trainings for hazardous materials and waste workers. The goal of PETE's CCCHST is to make worker training nationally available through its member organizations, whose instructors are prepared through a train-the-trainer model program, offering hazardous materials instruction in 32 states and two territories.

As a part of the CCCHST, Barton Community College in Kansas offers health and safety training to military personnel and transitioning service members. The program aims to ease the transition into public life for individuals leaving the military by providing them with the skills they need to obtain jobs related to hazardous materials.
