Restructuring BOL to Center for Academic Innovation & Excellence (Resident & Online Learning)

- **Challenge:**
 - Need a holistic approach to course and faculty development, training and support for all modalities.
 - Need dedicated staff to coordinate ADA, AI, and OER.
- **Solution:**
 - Added Director position for Innovation & Compliance
 - Restructure BOL to the Center for Academic Innovation & Excellence (Resident and Online Learning) for a system-wide approach to support instruction.
- **Overview of Plan:**
 - Restructure BOL to the Center for Academic Innovation & Excellence (Resident & Online Learning).
 - Hire a full-time Director of Innovation & Compliance for Academic Integrity (AI), Open Education Resources (OER) and Americans with Disabilities (ADA) coordination and support.
 - Move the Customer Support Specialist under the Director of Distance Learning Student Services from it's current position under the Associate Dean of Distance Learning.
 - Change title of Director of Instructional Development, Process and Training to Director of Instructional Excellence
 - Change title of Director of Distance Learning Student Services to Director of Distance Learning
 - Change title of Associate Dean of Distance Learning to Associate Dean of Instruction.
 - The Center will retain responsibilities to online coursework with the addition of resident (face-to-face) classes; the Center will also assume coordination of AI, OER and ADA.
 - The Associate Dean of Instruction will continue to report to the Vice-President of Instruction; Deans and Executive Directors will maintain their instructional responsibilities.
